GUILD TABLE TREES

for the festive note

HERE is a delightfully appealing way to adopt the living Christmas tree idea: A shapely spruce, standing 12 to 15 inches in a pretty artcraft pot, can be decorated in any number of ways. It is adorable on dinner table, mantelpiece or end table. This tree has been sheared and raised expressly for this purpose. It will make a valuable decorative evergreen for planting outdoors, after it has served its first purpose of giving holiday cheer.

GUILD GREETING TREES

A unique alternative to Christmas Cards!

GIVE a little living tree! It expresses the spirit of Christmas exactly. Its tiny fragrant branches, its attractive green art-craft pottery container and saucer, and the neat way it is packed in a special parcels post carton, express the extra thought of the giver.

This tree has been brought up with loving care so as to live and grow. It is a charming miniature when delivered (about 6 to 8 inches tall), and with the right care it will grow into a large tree. It will not be discarded after its first duty of bringing Christmas cheer is done—but it will live on and develop into a fine decorative evergreen. With these trees you are giving real gifts, indeed. Gifts that ripen with the friendship of each successive year.

Will you be among the thoughtful people who will send out these lovable greetings this year?

Each Little Guild Greeting Tree has a charming setting. It comes already planted in an artcraft green glazed pot, with saucer to match. An appropriate card, and instructions for its care, are included in each package.

Trees are individually boxed in mailing cartons so that you can remail them to different friends if you wish. Or our Special Mailing Service will send them direct on the date specified with your own card enclosed. Prices—

A Refreshing LIVING CHRISTMAS TREE For Your Family

THE LIVING TREE GUILD champions the cause of living Christmas trees. We plead that they be not destroyed; we invite you to discover the joy and satisfaction to be found in bringing up a real tree. . . . ever gaining in beauty and in value.

It will add a unique touch to your Christmas to point to your tree and say—"It is alive!" Then, when planted outdoors, it will take on increased freshness and vigor, and will grow into a large tree.

If everyone who uses a Christmas tree would *plant* a tree, instead of buying a young tree whose life has been cut short, immeasurable gain would accrue. It would instantly reverse the deplorable condition now existing . . . the sacrificing each Christmas of 4 million young trees.

Will you do your bit this Christmas for the preservation of American forests by using a living evergreen? Your special friends will love them too!

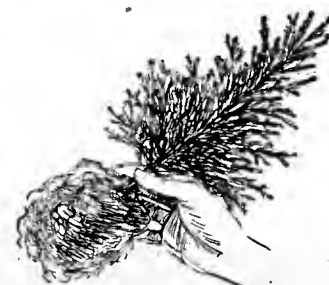

These Guild Trees—root grown into their pots—stand 26 to 36 inches tall including the depth of the joyful red container. When you take the tree out of its box it is all ready for use—green, fragrant, living.

Why GUILD TREES can be GUARANTEED TO LIVE

THIS year for the first time, ALL Guild Christmas trees are rooted into their pots. This is a special process that has taken time to perfect. It means that no roots are torn in potting. Thus, these trees have every chance of surviving. And it makes them far more beautiful than spruces grown in the usual way.

These are the most economical Christmas Trees you can have. They will grow and increase in value each year.
